

Charity Quinn

AI Solutions Engineer

Experience

Retool / Solutions Engineer

JUN 2025 – PRESENT

- Partnered with customers from early stage startups to Fortune 100s to design and deploy custom Retool applications, reducing implementation time by 50%+.
- Built AI driven workflows and agents with LLMs, embeddings, and RAG, enabling automation in highly regulated industries (healthcare, fintech) while ensuring compliance.
- Delivered tailored technical demos and proof of concepts to C-suite stakeholders, accelerating enterprise adoption.
- Architected self hosted deployments using Docker, Kubernetes, and AWS ECS/EC2 for customers requiring security first environments.

Capital One / Senior Software Engineer

AUG 2022 – JUN 2025

- Migrated 40+ RPA bots from VDIs to AWS EC2, cutting annual costs by \$500K and improving reliability.
- Designed and managed cloud infrastructure for 50+ internal clients, ensuring scalable and secure deployments.
- Automated CI/CD pipelines (Jenkins, AWS CodeDeploy, GitHub Actions), accelerating releases and improving consistency.
- Delivered internal applications in React/Node.js for call center agents, improving credit card dispute resolution by reducing processing time 20%.
- Product managed and built a self-service RPA platform enabling business teams to launch automated workflows without engineering support.
- Presented published research on team effectiveness at Grace Hopper National Conference and Capital One WITX.

Education

Georgia Institute of Technology

M.S. Computer Science
Jan 2024 – May 2026

Pennsylvania State University

B.S. Chemical Engineering
Aug 2018 – May 2022

Projects

AI for Stock Trading

- Built ML models to manage portfolios using historical/technical indicators.
- Evaluated performance via Sharpe ratio and Bollinger Bands; automated backtesting with Python.

RPA Self-Service Platform

- Designed and delivered a no-code portal for RPA workflows, empowering business users with prebuilt bots.

First Place in Company Wide Hackathon

- Developed a quick-search keyboard shortcuts, significantly reducing customer service agent search times and boosting productivity.

Skills

- Languages: JavaScript · Python · SQL
- Frameworks: React · Node.js · Vue
- Cloud & Data: AWS Certified Solutions Architect – Associate · Databricks · Snowflake · Docker · Kubernetes
- AI/ML: LLM integration · RAG · embeddings · compliance driven AI workflows
- Other: RPA (Automation Anywhere) · CI/CD (Jenkins, GitHub Actions) · REST APIs
